*"This will become the
basis of your work."*

No More Writer's Block!

Eliminate writer's block by generating content at 918 words per minute. With this generator, you can write a 500-word article in under a minute.

It's Artificially Intelligent!

First Draft is the ONLY editor that uses real artificial intelligence. The software contributes relevant content in real-time. It even generates content in your own, individual writing style. It's so smart, it works offline!

Client-Centered Content Development

First Draft generates the content that clients want faster than ever with a wide range of product-driven articles. Each article that First Draft generates is built from logic and a strong grasp of the English language.

"It's just an interesting and novel piece of software."

MILLIONS of articles and stories inside!

First Draft generates articles and stories in mere seconds too with keyword support, automated spelling and grammar correction, word requirements, pricing, earnings, and more.
